

2-day Certificate course on Printed Circuit Board Designing Concludes

Awantipora, April 11: Design Innovation Centre at Islamic University of Science and Technology, conducted a 2-day Certificate course on Printed Circuit Board Designing at its premises on 6th and 7th April 2022.

A total of 26 students participated for this certificate course which included students from Mechanical, Computer Science Engineering, Electrical and Electronics & Communications Engineering branches.

This certificate course was aimed at providing the students with the knowledge of Basic Printed Circuit Board Designing, to make familiar with PCB design and various processes involved and to provide adequate knowledge in design, performance analysis and fabrication of Printed Circuit Boards.
