- ❖ To impart an all-inclusive and comprehensive understanding of Philosophy as a discipline at basic, intermediate and advanced levels

- ❖ To develop a thorough understanding of world philosophical traditions across spatio-temporal boundaries

- ❖ To encourage engagement with substantive philosophical questions and debates of contemporary concern such as AI intervention, hyper-technologization, hyper-mediatization etc.

- ❖ To create a body of scholarly work that reflects not only the philosophical orientation of students and researchers but also a world-view compatible with the Indian multicultural ethos

- ❖ To organize workshops, conferences and expert talks to help students and researchers gain expert knowledge, enhance their professional and personal development and keep them updated with the emerging trends and thought processes

- ❖ To promote multi-disciplinary engagement and research with other areas/disciplines to address contemporary socio-political and ethical issues and challenges

- ❖ To foster research that underscores and helps explore the interdisciplinary essence and new vistas of philosophy and its multifaceted application

- ❖ To inculcate among students and researchers critical philosophical thinking and to ensure meaningful learning in a way that philosophy facilitates the manner in which they engage with reality, society, and the world at large.
