

Aspirations of Design Innovation Centre

DIC@IUST aspires to play a pivotal role in leading IUST to create a visible impact in the area of Design and Innovation. It would serve as a fountain-head for promoting rich interdisciplinary interaction that aims to solve local problems and obtain technological breakthroughs - positively impacting human life. It would create an environment that encourages exploration and experimentation and also nurture an ecosystem for start-up development. It would continue to serve as a place that imparts design-based education and encourages interdisciplinary design-focused innovation, promoting experiential learning through hands-on projects. Lastly, it aspires to provide the right platform and ecosystem for knowledge sharing and collaboration amongst industry and academia.
