

## **M.Sc. Chemistry**

A Master's student from the Department of Chemistry can aspire for higher studies in top institutes of high repute from the country and all over the world. The students will be further able to obtain employment in educational institutes, research and testing laboratories, pharmaceutical and food processing plants and also in medical/pharmaceutical/scientific companies as analysts and technicians. The demand for new and increasingly sophisticated analytical techniques, new instrumentation, automation and computerization, and regulatory requirements have opened up new opportunities for Chemists in other areas like chemical or forensic analysis, process development, product validation, quality control, toxicology, drug formulation and development

**DURATION:** 02 Years (04 Semesters)

### **WHO CAN APPLY?**

A candidate with a three-year Bachelor's Degree in any science discipline with chemistry as one of the subjects studied in all the three years of graduation.
