

ABOUT US

The department of chemistry was established in 2016 and since then we are running the postgraduate course (M.Sc. Chemistry). Later, in 2018, we started the Ph.D. program, and we have launched a four-year undergraduate course in chemistry, recently in 2024. Despite being a young department, we have made significant progress towards the development of the human resource and infrastructure necessary to provide high-quality education and research opportunities. Our mission is to provide students with a comprehensive education in chemistry, equipping them with the knowledge and skills needed to pursue diverse career paths and contribute to scientific advancements. The courses have been designed in meticulous way to be beneficial for the science graduates who are dreaming to work in the educational institutes, pharmaceutical industries, polymer fabrication, and paint industries or to pursue a carrier in research from reputed institutions in India and abroad.

The emphasis is laid on active learning, fostering curiosity, creativity, and critical thinking, with a strong focus on practical applications. Our curriculum is continually updated to align with the guidelines of the University Grants Commission and the National Education Policy 2020, ensuring a multidisciplinary approach to chemical sciences. With laboratories equipped with modern facilities and a rich departmental library, we are committed to producing skilled chemists ready to tackle regional, national, and global challenges. Looking ahead, the department envisions leading research in key areas such as carbon dioxide utilization, water harvesting, drug design and delivery, transition metal catalysts, and supramolecular architectures.
