Programming Lab

The Programming Lab was established at the department with the inception of the department. Students in Programming lab progress through a series of programming tasks and challenges to build from easy to difficult. It is and can be used by elementary students to create games, computer animations, and all sorts of other projects. The lab is equipped with the latest software and computer systems. The system has i7 processors with 8 Gb of minimum RAM and has installed all necessary softwares like Python, Eclipse, Dev C++, JDK framework and Code blocks. An overhead short throw projector is also installed in the lab.
