

“

*I deem it the heyday of my life when I got admission in the university because it is this university wherein the plinth for my overall educational achievements was laid. My two years at IUST had been a wonderful experience which I am going to cherish for the rest of my life. The department of English in particular is very promising. The entire faculty there is very dedicated, sincere, resourceful, proficient and what not. The classes during my post-graduation were very interactive and engaging. Teachers were skillfully making it a two-way traffic as students were always encouraged to ask questions. The lectures were very thought-provoking. It was in this department that the interest for research was instilled in me. The student support facilities like linguistic lab and library were quite beneficial and praiseworthy. And I believe whatever I am today, it is because of the department of English, IUST. This hub of excellence serves as a beacon light for all those who seek the path of knowledge, progress, and prosperity.*
