

“

I had the privilege of being a student in the first batch of B.A (Hons) in English course offered by the Department of English Language and Literature in Islamic University of Science and Technology. IUST is very student- friendly and has a proper management and administration which makes the life in campus very feasible.

The framework of our course was planned in a very refined manner. The subjects and texts that were selected for our course offered a broad spectrum of various genres and variety in them. The best feature of our course was writing a Term Paper in the last semester and I am grateful to have had the chance of getting an understanding about academic writing and develop acquaintance to the field of research. It really helped me in my career choices and goals as I realized my interest in research work. The subsidiary and open elective courses offered by the university expanded our area of knowledge and exposed us to various other fields which added various prisms to our interpretations of literature.

I will always be indebted to the faculty and staff for being so dedicated and consistent in guiding us and ensuring our growth and development with feasibility in this journey. It was because of them that I was able to get selected in Jamia Millia Islamia for Masters in English. Forever grateful and indebted to Department of English, IUST.
