

DEPARTMENT OF MECHANICAL ENGINEERING

Alumni speaks

I take immense pride in being an alumni of the Islamic University of Science & Technology. The university provided me a chance to nurture my talent and polish my personality. In addition to a strong focus on academics, I was provided the opportunity to intern at various reputed institutions across the country such as Vizag Steel Plant and IIT Kanpur. I sincerely wish to thank all my teachers for their guidance which continues to serve as a beacon of light for me even after my graduation. I am confident that in coming years, Islamic University of Science & Technology will go on to become the premier university of Jammu & Kashmir.

- **Suhail Nazeer** , MG Fellow, CAT percentile 99.13

"IUST, for me, is beyond just an academic institution. It gave me opportunities to think and explore and ultimately make an informed decision about my career. The support of faculty members helped me to score good marks in GATE and go for M.Tech at an institute of repute. My interactions with faculty members helped me to not only learn academically from them but also overcome my flaws to become a better human being. What we learn with pleasure, we never forget. I remain forever grateful to IUST for making me this a lived experience for me."

- **Shabir Hussain Mir**, M.Tech NIT Surathkal

"I completed my bachelors in technology with the aim of entrepreneurship in mind so that I may not only attain financial stability for myself but also generate employment for others. IUST, Entrepreneur Development Cell, guided me well to work on my target, providing a lot of knowledge and experience through workshops on entrepreneurship and field visits. I am sincerely thankful to my university for providing valuable experiences throughout the B.Tech program which make me feel proud to be an alumnus of IUST."

-**Farhan Andrabi**, Director of KAFA. INDUSTRIES Pvt. Ltd

"When I joined IUST at first I was sceptical about how my experience would turn out. But with the passage of time, plenty of opportunities came my way which contributed to my professional growth tremendously. I got to work as an intern at some of the top labs in the country at IIT Kanpur and IIT Ropar which provided much needed technical exposure."

- **Readi Fellow**, IHFC, IIT Delhi.
