

Visit of B.Tech & M.Tech Food Tech Students to JKLCMA, Sewage Treatment Plants

Department of Food Technology, IUST, Awantipora organized a visit to the JKLCMA, Sewage Treatment Plants for the students of B.Tech and M.Tech Food Technology on 31st August 2023. They visited two major STPs namely the Brarinumbal and Hazratbal STP of Srinagar. The purpose of this visit to the sewage treatment plants was to gain a comprehensive understanding of the processes involved in treating wastewater and its significance in environmental protection and public health.

This visit greatly enhanced the students' educational experience by providing them with a first-hand understanding of wastewater treatment processes and their importance in environmental conservation. By witnessing the operations of a STP, the students gained insights into the complexities of wastewater treatment, pollution prevention, and sustainable urban development. This experience aligns perfectly with our pledge to providing a well-rounded education that equips our students with real-world knowledge and skills.

A total of 62 students were a part of this visit which was coordinated by Dr. Owais Yousuf and Dr. Farhana Mehraj of Department of Food Technology.
