

# Launch of DynaMecX: Official Student Club of DoME

We are thrilled to announce the official launch of "DynamecX", student club of the Mechanical Engineering Department at the Islamic University of Science & Technology, Pulwama.

Today, we celebrated this occasion with the inaugural event held in the atrium of the Rumi library. It was an honor to have Dr. Rumaan Bashir, Dean of the School of Engineering and Technology, grace us with her presence.

We also extend our gratitude to all the dedicated members of the club who put in great effort and hard work to organize such a wonderful gathering.

As we embark on this exciting journey, we invite all mechanical engineering students to join DynamecX and nurture a vibrant community to exchange knowledge.
