

CIED IUST FOUNDATION

AWANTIPORA

An outreach Program Students of Solace International School Boonera Pulwama visit different Departments at IUST.

An outreach program was held at IUST in which students of Solace international School Boonera Pulwama visited CIED IUST Foundation also.

Prof. Parvez A. Mir, Director of the Centre for Innovation and Entrepreneurial Development (CIED) at IUST Foundation, engaged with students to provide an insightful overview of the department and its objectives. He highlighted CIED's commitment to enhancing educational opportunities and addressing the unique needs of students through diverse outreach programs. His discussion emphasized the crucial role of innovation and entrepreneurship in creating a supportive learning environment, inspiring students to explore their potential and pursue their entrepreneurial ambitions.

The students' visit to the Embedded Systems and Robotics Lab was incredibly impactful! Engaging directly with advanced technologies in such a hands-on environment can really spark interest and creativity. Robotics and embedded systems are crucial areas for future innovation, so experiencing them firsthand must have been both exciting and enlightening for the students.

The students visit the High-Performance Computing Lab must have been inspiring, especially with the chance to engage with advanced tools and projects. Connecting theoretical concepts with real-world applications can be a game-changer in understanding technology and innovation.

The students also visit the Food Technology Lab must have provided the students with practical insights into the food industry. Hands-on exposure to processes like preservation techniques and product development can really ignite their interest and creativity.

The overall visit was thoughtfully designed to provide valuable insights, resources, and inspiration specifically for female students, encouraging them to explore and pursue careers in innovation and entrepreneurship.
