

CIED IUST FOUNDATION

AWANTIPORA

An outreach Program Students of Govt Higher Secondary School Nanil Anantnag visit different Departments at IUST.

An outreach program was held at IUST in which students of Govt Higher Secondary School Nanil Anantnag visited CIED IUST Foundation also.

Prof. Parvez A. Mir, Director of the Centre for Innovation and Entrepreneurial Development (CIED) at IUST Foundation, engaged with students to provide an insightful overview of the department and its objectives. He highlighted CIED's commitment to enhancing educational opportunities and addressing the unique needs of students through diverse outreach programs.

During the session, Prof. Mir emphasized the crucial role of innovation and entrepreneurship in fostering a supportive learning environment. He inspired students to explore their potential and encouraged them to pursue their entrepreneurial ambitions. His discussion underscored the importance of practical skills and creative thinking, equipping students with the mindset needed to navigate the challenges of the modern economy.

Mr. Syed Abdul Basit conducted an engaging session with students focused on innovation and entrepreneurship development. He emphasized the importance of creativity in problem-solving and the entrepreneurial mindset necessary for success in today's dynamic market.

Mr. Adnan Ali Khan also provided valuable insights on the challenges and opportunities in the entrepreneurial landscape, motivating students to pursue their passions and embrace innovation as a key driver of change.

The students' visit to the Embedded Systems and Robotics Lab was indeed a remarkable experience! Engaging directly with advanced technologies in such a hands-on environment can ignite interest and creativity. Exploring robotics and embedded systems, which are pivotal for future innovation, allowed students to see real-world applications of their studies. The interactive demonstrations and projects provided insight into the complexities and possibilities within these fields, making the learning experience both exciting and enlightening.

The students' visit to the High-Performance Computing Lab was truly inspiring! Engaging with advanced tools and projects provided a unique opportunity to connect theoretical concepts with real-world applications. Seeing high-performance computing in action can be a game-changer, as it highlights the power of technology in solving complex problems and driving innovation. The hands-on experience allowed students to grasp how these technologies impact various fields, from data analysis to artificial intelligence. This exposure not only enhances their understanding of the subject but also motivates them to explore potential career paths in technology and research. Overall, the visit was a fantastic way to bridge classroom learning with practical experience, igniting curiosity and ambition among the students.

The overall visit was thoughtfully designed to provide valuable insights, resources, and inspiration specifically for female students. By focusing on encouraging them to explore and pursue careers in innovation and entrepreneurship, the program aimed to empower these students and foster a supportive community.
