CII IGBC Members Visit CIED-IUST Foundation and Interact with Architecture Students.

Indian Green Building Council (CII IGBC) visited the Centre for Innovation and Entrepreneurship Development (CIED) at the Islamic University of Science and Technology (IUST). The visit provided an excellent opportunity for architecture students to engage with IGBC representatives, who introduced them to various green building projects and schemes endorsed by IGBC.

The session was inaugurated by Prof. Parvez A. Mir, Director of the CIED-IUST Foundation, who warmly welcomed the IGBC members and expressed his enthusiasm for the collaboration between industry professionals and academia. The interaction aimed to broaden the students' knowledge on sustainable architecture, energy-efficient buildings, and the benefits of adopting IGBC standards in the design and construction of green buildings.

The main goal of the visit was to educate students, future architects, engineers, and other professionals about green building principles and practices, as well as the benefits of environmental sustainability in the built environment. The event highlighted the importance of innovation and sustainability in architecture and provided a platform for future professionals to learn about the industry's best practices and standards.

The purpose of the visit was to engage with architecture students at IUST, where IGBC members shared insights about various green building projects and sustainability schemes spearheaded by the council. The interaction aimed to enhance the students' understanding of sustainable design.
