ISLAMIC UNIVERSITY OF SCIENCE AND TECHNOLOGY

AWANTIPORA, KASHMIR

__Office of Community Connect__

Date: 01.05.2025

Target Audience: 25 students from Government Boys High School, Padgampora

Description:

The Department of "Electronics and Communication Engineering" Islamic University of Science and Technology, Awantipora organized hands-on learning session under the Unnat Bharat Abhiyan (UBA) initiative. As part of this activity, 25 students from Government Boys High School, Padgampora were invited to visit the university campus. During their visit, they explored the Electronics Laboratory, where they were introduced to basic concept and simple experiments. The sessions, led by Dr. Romana Yousuf, Dr. Shaiqa Nasreen, Dr. Asif Bashir, Dr. Issmat S. Masoodi, and Ms. Safeena Rasool, allowed the school students to engage with real-world applications of electronics in an accessible and engaging manner. The primary objective of this initiative was to ignite curiosity and foster an early interest in STEM (Science, Technology, Engineering, and Mathematics) among school students. It also underscored the efforts of university to promote rural outreach and school-level engagement in alignment with the goals of the UBA program and university outreach initiative.

The event received an enthusiastic response from the students and their teachers, who appreciated the opportunity to connect theoretical knowledge with practical exposure in a university setting.
