Department of Economics Conducts Outreach Programme at Govt. Model Higher Secondary School, Dooru Anantnag,

Date:09-06-2025

Description:

In a significant step towards strengthening community engagement and promoting academic awareness, the Department of Economics successfully conducted an outreach programme at *Govt. Model Higher Secondary School, Dooru*. The event aimed to introduce school students to the fundamentals of economics, provide career guidance, and foster an early interest in higher education.

The programme featured interactive sessions led by faculty members and student volunteers, focusing on the relevance of economics in daily life, potential career paths, and higher education opportunities in the field. The sessions were designed to be student-friendly, engaging participants through real-life examples, discussions, and an interactive quiz segment.

The response from students was overwhelmingly positive, with many expressing keen interest in pursuing economics and related fields in their future studies. A special Q&A session allowed students to clarify doubts regarding university admissions, scholarship opportunities, and the scope of economics in public and private sectors.

The Principal of Govt. Model Higher Secondary School, Dooru, appreciated the initiative and highlighted the need for more such academic collaborations that bridge the gap between school and university education. The programme concluded with a vote of thanks and a mutual commitment to continue such efforts for the academic upliftment of students in the region.
