## **One-Day Exposure Visit for Students of PM Shri Govt. Higher Secondary School Maligam, Ramban.**

**Date: 06-05-2026**

**Target Audience:** Students of PM Shri Govt. Higher Secondary School Maligam, Ramban.

**Description:**

The Office of Community Connect (IUST), under the aegis of the Dean Outreach, organized a one-day exposure visit for the students of PM Shri Govt. Higher Secondary School Maligam, Ramban on 6th May 2026. The visit witnessed the participation of more than 160 students, accompanied by 21 faculty members. The programme was aimed at familiarizing students with the university's academic environment, advanced laboratories, and research-oriented learning facilities.

During the visit, the participants explored several important departments and facilities across the university campus. The students visited the **Rumi Library**, where they were introduced to its extensive collection of academic resources, digital learning facilities, and modern study spaces that support higher education and research activities.

The group also toured the **Department of Physics**, where they gained insights into modern scientific instruments, experimental techniques, and ongoing research activities in the field of physical sciences. Faculty members highlighted the significance of physics in scientific innovation and technological advancement.

The participants further visited the **Department of Chemistry**, where they were acquainted with laboratory practices, chemical analysis procedures, and practical applications of chemistry in industry and daily life. The students also observed demonstrations involving advanced laboratory instruments and experimental methods.

In addition, the students explored the **Department of Mechanical Engineering**, where they learned about engineering design, manufacturing technologies, and the practical functioning of mechanical systems through interactions with faculty members and laboratory staff.

The exposure visit also included a tour of the **Department of Food Technology**, where students were introduced to food processing techniques, quality control practices, and modern technologies used in food production and preservation. The visit provided valuable exposure to the scientific and technological dimensions of the food industry.

The programme offered students meaningful exposure to higher education opportunities and emerging fields in science and technology. The visit served as an enriching educational experience, inspiring participants to pursue academic excellence and future careers in diverse scientific and technical disciplines.
