KASHMIR

Office of the Community Connect

One-Day Academic Exposure visit to students GHSS, Vehil, Shopian.

Awantipora, **August 17, 2026**: An educational exposure visit was organized at the Islamic University of Science and Technology (IUST), Awantipora, for 100 students of Government Higher Secondary School, Vehil, Shopian, on 17 September 2026. The visit was facilitated by the Office of Community Connect under the aegis of the Dean Outreach, with the objective of familiarizing school students with the academic, laboratory, and learning environment of a higher educational institution.

Accompanied by four faculty members, the students participated in interactive sessions and undertook guided visits to the **Department of Computer Science Engineering** and **Department of Civil Engineering**. The students were introduced to various laboratory facilities and had the opportunity to observe practical applications of concepts taught in their classrooms, thereby gaining first-hand exposure to scientific and technological learning.

The sessions were conducted with the support of Departmental Community Coordinators, faculty members, and technical staff, who engaged with the students and provided information regarding academic programmes, higher education opportunities, and the significance of practical and experiential learning.

The visit provided the students with an enriching learning experience, exposing them to laboratory-based education, innovative scientific concepts, and safe practices in laboratory environments, including the proper handling of chemicals. The students were also sensitized to the importance of hands on learning for skill enhancements, digital learning, and personal growth.
