

CIED IUST FOUNDATION

AWANTIPORA

An outreach Program Students of Khyber Public School Repora Chadoora Budgam visit different Departments at IUST.

An outreach program was held at IUST in which students at Khyber Public School Repora Chadoora Budgam visited CIED IUST Foundation also.

Prof. Parvez A. Mir, Director of the Centre for Innovation and Entrepreneurial Development (CIED) at IUST Foundation, engaged with students was to provide an insightful overview of the CIED Department and its objectives. His introduction highlighted the department's commitment to enhancing educational opportunities and addressing students' specific needs through its outreach programs.

Prof. Parvez A. Mir elaborated on the goals of these programs, emphasizing their role in providing career guidance and fostering skills essential for future success. He showcased the dynamic world of innovation and entrepreneurship, illustrating how these fields can offer diverse and exciting career paths. By exposing students to various aspects of innovation and entrepreneurial ventures, he aimed to spark their interest and inspire them to explore these areas further.

The students visited the Computer Science and Engineering Lab at IUST, a visit designed to enhance their practical skills and ignite their passion for technology and innovation. This lab experience plays a crucial role in their overall educational journey, offering hands-on opportunities that bridge theoretical knowledge with real-world applications.

The students also visited to the Food Technology Labs at IUST offered a hands-on exploration into the fascinating world of food science and technology. This visit was designed to give students practical insights into the processes, innovations, and applications within the food industry.

The overall visit was meticulously designed to offer valuable insights, resources, and inspiration specifically tailored for girl students, encouraging them to explore and pursue careers in innovation and entrepreneurship.
