

Harnessing AI in Research

Introducing Rubriq

Rubriq is an AI-powered writing assistant designed specifically for academic papers. It provides intelligent suggestions, improves writing structure, enhances flow, and assists with citations to help you produce high-quality academic content.

It also helps in -

Streamlining the editing process:

Rubriq quickly identifies areas in a researcher's manuscript that require revision or refinement, grammar check, saving them time.

Elevating the quality of academic writing:

Rubriq suggests improvements to clarity, precision, and style, so that researchers can communicate their findings more effectively.

Rubriq's suggestions are tailored to researchers' needs:

Rubriq allows researchers to maintain control over their writing by delivering edits as tracked changes, allowing for easy review. This tool edits your existing content and does not generate new content that could cause plagiarism.
