IUST organizes special lecture on Thermoelectric materials

Awantipora 18th October: The Department of Physics, IUST organized a special lecture on the topic “Thermoelectric materials and their properties” on Tuesday.

Dr. Shakeel Ahmad Khandy, High Talent Research Fellow at the Hangzhou Global Scientific and Technological Innovation Centre, School of Micro-Nano Electronics, Zhejiang University China delivered the special lecture.

Having worked as a postdoctoral fellow for 3-years in theoretical physics; Dr. Shakeel is actively engaged in research and has published more than 70 articles in internationally reputed SCI journals. He is currently working in the field of Materials Science and Condensed Matter Physics via DFT simulations and shares his research experiences in collaboration with various International groups from Germany, Algeria, China, Saudi Arabia, India, etc.

The lecture concluded with an interaction session with the students and research scholars of the department wherein Dr. Shakeel, shared his experiences and talked about the academic opportunities in South Asian countries especially in Taiwan, China and South Korea.
