AWANTIPORA, KASHMIR

Aptitude Test

Awantipora, May 16, 2024 - The Centre for International Relations (CIR) at the Islamic University of Science & Technology (IUST), Kashmir, successfully completed student aptitude assessment conducted in collaboration with the Centre for Career Counseling and Placements (3CP) on May 16, 2024. This initiative was designed to assess students' skills and readiness for employment and to identify areas for improvement, enhancing their preparedness for the job market.

With a participation of 65 students, the aptitude test was conducted in CIR classrooms ABV 005 and ABV 010, at 11 am. The test covered key skills including numerical reasoning, verbal ability, logical reasoning, and critical thinking. Results from this assessment will be instrumental in helping students understand their strengths and weaknesses, ultimately improving their prospects for placements.

The successful collaboration underscores CIR's commitment to student development and placement readiness. CIR looks forward to more collaborations with 3CP to benefit the students.
